EXPERIENCE

Cliffex Software Solution | Associate Software Engineer

Dec'21 – present | Noida, India

- Added caching for Api which reduced the response time using **Redis**
 - Created the dashboard of Freelancing project which fetched all the details of **Client, Creator & Managers** by creating api in **Node.js** and rendering the data in **React.js**
 - Created the API for feedback flow for generic issues which displayed various fields like proposal types and problems faced etc. Also implemented the API for storing the data given by the user in **MongoDB** through that.
 - Added the **Onboarding process** for newly added Creators..
 - Added functionalities to the front end to enhance user experience.
 - Created a dating Application backend from scratch.
 - Tech Stack: React, MongoDB, Redis, Postgres, Express, Firebase
- Project ref:- [IndieFolio.com](#)

PROJECTS

Rentify | Project | [Source Code](#)

- Designed & developed a Web App with back-end on Node.js, Express.js, EJS & MongoDB database & front-end using HTML, CSS & React.
- Added feature where users can sell/rent movies.
- Implemented with New React router v6
- Implemented Authorization and Validation, Pagination.
- Tech Stack Used: React, Node, Express, MongoDB.
